

Reduce Phishing Failure Rates Guaranteed.

phishFixIQ's unique approach can reduce phishing rates by **up to 75%**. Let us demonstrate how.

You've Tried it All - Hardware, Software and Generic Security Awareness Training with Little Success

That's because up to **90%** of all cyber breaches are caused by **human error**, something technology can't fix on its own. Our game-changing learning solution blends cybersecurity and psychology, or **CYBERology™**, making our platform more effective and efficient at changing on-the-job behavior.

phishFixIQ is Proven to Measurably Reduce Click-Through Rates on Phishing Schemes

Our curated and style-aligned learning solution improves mindfulness and situational awareness to overcome natural impulses and instincts, **reducing clicks on phishing links.**

Fix Your Clicks Today!

phishFixIQ
Phishing Behavior Modification

3-Steps to Reduced Phishing Failures

Step 1 myQ

For only \$10 USD per user, license each user on our solution - let **myQ** uncover your employee's Risk-Style.

Step 2 phishFixIQ

Educate your employees with our **style-aligned, phishFixIQ** - Phishing Behavior Modification training.

Step 3

Re-test your users within 30-days of training with your phishing solution and watch those click-rates decrease - **guaranteed**.

Visit cyberconIQ.com to purchase today.

Behavior Change Guarantee

We're so confident in our style-aligned learning solution, that we **guarantee to reduce your phishing failure rates.**¹

¹If an employee fails a phishing test within 30-days of completing the phishFixIQ training, cyberconIQ shall refund the value of license (\$10USD) for that user, upon validation of test results. Please contact us for further details.

"The recent cyberattacks have forced companies to see ransomware as a threat to core business operations and not just data theft, as ransomware attacks have shifted from stealing to disrupting operations."

Anne Neuberger, cybersecurity adviser at the National Security Council
